

#### From the INTERNATIONAL BUREAU

## **PCT**

#### NOTIFICATION OF ELECTION

(PCT Rule 61.2)

To:

Commissioner
US Department of Commerce
United States Patent and Trademark
Office, PCT
2011 South Clark Place Room

CP2/5C24 Arlington, VA 22202

Date of mailing: 22 February 2001 (22.02.01)	in its capacity as elected Office	
International application No.: PCT/GB00/03011	Applicant's or agent's file reference: P022524WO  Priority date: 11 August 1999 (11.08.99)	
International filing date: 04 August 2000 (04.08.00)		
Applicant: BENTLEY, Jonathan, Mark et al		

1.	The designated Office is hereby notified of its election made:
	X in the demand filed with the International preliminary Examining Authority on:
ŀ	06 December 2000 (06.12.00)
	in a notice effecting later election filed with the International Bureau on:
2.	The election X was
	was not
	made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).
	Nule 32.2(0).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland Authorized officer:

J. Zahra

Telephone No.: (41-22) 338.83.38

Facsimile No.: (41-22) 740.14.35

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference	FOR FURTHER see Notification of (Form PCT/ISA/2	of Transmittal of International Search Report 220) as well as, where applicable, item 5 below.

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

## INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

#### Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

- 1- Claims 25-27 relate to subject matter considered by this Authority to be covered by the provisions of Rule 67.1 (iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject matter of these claims, cf. Article 34(4)(a)(i) PCT.
- 2- Claim 28 does not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined. The claim attempts to define the subject-matter in terms of the result to be achieved (i.e.: the preparation of the compounds of formula (I)) which merely amounts to a statement of the underlying problem. Accordingly, due to the lack of the technical features necessary for achieving this result a preliminary opinion in the sense of Art. 33(1) PCT cannot be given.

#### Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1- In the present Opinion reference is made to the following documents:

d1: EP 0 655 440 A

d2: EP 0 657 426 A

d3: US 3 329 571 A

d4: DE 930 988 C

d5: US 3 142 678 A

d6: US 2 541 211 A

d7: US 2 687 414 A

d8: EP 0 700 905 A

d9: WO 98 30548 A

- 2- Novelty
- 2.1- D5 discloses penthienoindole derivatives represented by the general formula of

claim 1 which partially overlaps with the formula (I) of the present application. D5 discloses also a specific compound (example 4) encompassed by present formula (I). The compounds of d5 are pharmaceutical agents used as antidepressant, inhibitors of appetite, tranquillizers and for the treatment of CNS diseases (cf. column 1, lines 24-29).

Thus, in view of the disclosures of d5, the product claims including the compounds of d5 (claims 1-9, 11,12, 14) and the uses, methods and pharmaceutical compositions according to claims 16-19, 25,27,29,30 are not novel in the sense of Art. 33.2 PCT.

2.2- The compounds of the present application are novel vis-à-vis d1, d2, d8, d9 on account of the heterocyclic system (fused indole) which is not present in these documents and are novel vis-avis d4 on account of the R3 group.

The compounds of d3 differ from the compounds of the invention in that the ring fused to the indole moiety (corresponding to the present ring A) contains, at least, seven atoms.

The products of the examples 5-6 of d6 and 19, 21 of d7 are excluded from the scope of the present claims for the effect of the proviso of claim 1.

#### 3- Inventive step

3.1- D3 discloses tricyclic compounds acting on the central nervous system and useful as antidepressant, inhibitors of appetite, and tranquillizers. This document is regarded as the closest state of the art. The technical problem can be considered the provision of further agents for the treatment of the diseases defined in claims 17-18.

As already indicated, the compounds of d3 merely differ from the compounds of the invention for the size of the ring fused to the indole moiety. For instance, the compound of Example 4 of d3 differs from the compounds of present formula (I) only for the presence of an additional CH2 group.

It appears that, due to the similar or identical activity to the compounds of d3, the skilled person starting from the teaching of this document would arrive to the compounds of the invention without any inventive activity.

Thus, in the absence of unexpected properties vis-à-vis the compounds of d3, do not satisfy the requirements of Art. 33(3) PCT.

3.2- Additionally, it is also observed that the possible generalisations of the activity

## INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

shown for specific compounds should extend only to those variants being obvious modifications and equivalents of the compounds tested. In the present case, the results of the tests given on page 19-20 of the description, concern almost always compounds where R4-R7 are halogen or small alkoxy groups. It appears that starting from these data there is no basis for assuming that those compounds substituted by radicals such as aryloxy or carbo-aryloxy maintain the same activity. In general, the non-limitative definitions used in the claims such as aryl, alkyl and prodrugs (cf. claim 1) have the effect of extending the scope of the claims to an undefined class of compounds for which the claimed activity can never be convincingly shown. It is remembered that only those compounds which represent a solution of the technical problem could be considered inventive

#### 4- Industrial applicability

For the assessment of the present claims 25-27 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

#### Re Item VII

## Certain defects in the international application

- 1- The statement in the description on page 6, 2° paragraph, concerning the possibility of the groups R1-R7 to be substituted, implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them (see also the PCT Guidelines, III-4.3a).
- 2- To meet the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in all the documents cited in the International Search Report should be identified and briefly discussed.

# INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/03011

3- The sentence "It will be...invention" (page 17, lines 23-24) is considered irrelevant and thus superfluous, cf. Rule 9.1 (iv) PCT.

SIFICATION OF SUBJECT MATTER
